Energy-Efficiency and High-Performance Comfort—Year-Round!

No matter the season, your family will enjoy premium indoor comfort with your new Amana® brand APG13 Packaged Gas/Electric Unit. And with the energy savings (as compared to lower AFUE units) and durability this packaged unit provides, that comfort could extend all the way to your pocketbook!

Your new Amana brand APG13 Packaged Gas/Electric Unit combines what we believe to be the best of the Amana brand's furnace and condensing unit technologies, all in one self-contained "package." With its advanced, energy-efficient compressor, the unit's air conditioner has a cooling efficiency of 13 SEER. And the heating component provides efficiencies of 80% AFUE. Add to that the durability provided by the Amana brand's stainless-steel, tubular Million-Air™ heat exchanger, and you have a unit designed to provide you with premium comfort for years to come.

We're so confident in the quality of your Amana brand APG13 Packaged Gas/Electric Unit that we cover both its heat exchanger and its compressor with a **Lifetime Limited Warranty* for the original, registered homeowner for as long as you own your home.** Not many companies will go to such lengths to reassure the buyer of the quality of their products. In our opinion, few make a product close to the quality of the Amana brand APG13 Packaged Gas/Electric Unit.

Million-Air™ Heat Exchanger

The heart of your Amana brand packaged unit's heating technology is its patented Million-Air™ stainless-steel tubular heat exchanger. Formed using our patented dual-diameter pipe and wrinkle-bend technologies, the Million-Air is built to last. One of these heat exchangers has endured over two million extreme-temperature test cycles—and it is still going strong.

Energy-Efficient Compressor

Delivering outstanding economy, your Amana brand APG13 Packaged Gas/Electric unit is built using an energy-efficient scroll compressor. Thanks to its high-quality compressor, this unit cools efficiently, quietly and dependably, with less wear and tear for longer life compared to lower SEER units that use a reciprocating compressor.

Efficient Condensing Coil

Our coil design provides energy-efficiency in minimum space. Aluminum fins are bonded to enhanced copper tubing for more efficient heat transfer. All coils are leak checked electronically and pressure-tested three times during the manufacturing process to assure reliability.

Quiet Performance

We have done our best to combine a quiet, high-efficiency scroll compressor with an optimized blower system and a fully insulated cabinet to help insure quiet operation, which we hope will make you and your neighbors very happy!

**To receive Lifetime Heat Exchanger Limited Warranty, Lifetime Compressor Limited Warranty and 10-Year Parts Limited Warranty, online registration must be completed within 60 days of installation. Online registration is not required in California or Quebec. Full warranty details available at www.amana-hac.com.*

Built to Last

Your space-efficient Amana brand APG13 Packaged Gas/Electric Unit can be ground- or rooftop-mounted. Its cabinet is built using high-quality, heavy-gauge, zinc-coated steel with a weather-resistant powder-paint finish. A stamped steel louvered grille protects the condenser coil, and the unit's subtle color scheme complements nearly all exterior home environments.

Premium Warranty

We're so confident in the lasting power of your Amana brand APG13 Packaged Gas/Electric Unit that we protect it with what we believe to be one of the best standard warranties and extended service plans in the industry. For the original, registered homeowner, we cover both the heat exchanger and compressor in this unit with a **Lifetime Unit Replacement Limited Warranty*** for as long as you own your home. All remaining functional parts are covered by a **10-Year Parts Limited Warranty.***

AsureSM
EXTENDED SERVICE PLAN

For even greater peace of mind, ask your dealer or visit our web site at www.amana-hac.com for more details about **Asure**SM an affordable Parts and Labor Extended Service Plan for your entire Amana Brand HVAC system.†

Amana Quality

Americans have been relying on long-lasting Amana® brand products since 1934, when Amana, Iowa, native George Foerstner accepted the challenge of building a dependable beverage cooler. Since then, the Amana brand has enjoyed many firsts, including developing the first cold storage locker, being the first manufacturer to nationally market an upright freezer for home use, and introducing the first portable countertop microwave oven.

The residents of Amana, Iowa, began a long history of pioneering and craftsmanship, and that spirit continues today in the manufacturing of quality Amana Heating & Air Conditioning products. From the technology behind our patented Million-Air™ heat exchanger to what we believe to be some of the industry's best warranties to the inclusion of high-quality filter dryers in each of our air conditioners and heat pumps, we remain committed to Amana's legacy of providing consumers with heating and cooling products that are built to last.
