High-Efficiency and High-Performance Gives You Year-Round Comfort!

No matter the season, your family can enjoy premium indoor comfort with your new Amana® brand APH15M Packaged Heat Pump, one of our premier heat pump products. And, with the energy savings and durability this packaged unit provides, that comfort could extend all the way to your pocketbook!

Your new Amana brand APH15M Packaged Heat Pump combines what we consider to be the best of the Amana brand's indoor comfort technologies, all in one self-contained "package." With its advanced design, the unit's cooling capacity reaches efficiencies up to 15 SEER and the heating efficiencies of up to 8.0 HSPF. When you want quality and durability, choose the Amana brand because it lasts and lasts and lasts.

High-Efficiency Compressor

Delivering outstanding economy, your Amana brand APH15M Packaged Heat Pump is built using high-efficiency scroll compressor. Thanks to its high-quality compressor, this unit cools efficiently, quietly and dependably for longer life compared to lower SEER units with a reciprocating compressor.

Efficient Condensing Coil

Our coil design provides maximum efficiency in minimum space. Aluminum fins are bonded to enhanced copper tubing for more efficient heat transfer. All coils are leak-checked electronically and pressure-tested during the manufacturing process to assure reliability.

Energy Efficiency

A packaged unit's cooling efficiency is indicated by its Seasonal Energy Efficiency Ratio (SEER), which is a measurement of a condensing unit's efficiency developed by the EPA. Your new Amana brand Packaged Heat Pump offers up to 15 SEER, one of the highest ratings in the industry. In fact, when properly installed, your Amana brand APH15M

Packaged Heat Pump meets the higher standard of the Environmental Protection Agency's (EPA's) Energy Star Program.**

Your Amana brand APH15M Packaged Heat Pump also can provide high-efficiency heating performance up to 8.0 HSPF (Heating Seasonal Performance Factor).

What is R-410A?

Compared to lower SEER, R-22 refrigerant units, our new Amana brand APH15M Packaged Heat Pump will not only provide you with energy-efficient cooling performance for many years, but it also features R-410A refrigerant. Since this refrigerant does not contain chlorine, it is environmentally-friendlier than R-22 refrigerant, which is currently used in most air conditioning systems. Introduced in 1995, R-410A refrigerant has helped increase the durability and reliability of compressors.

** ENERGY STAR ratings are dependent upon conditions beyond equipment installation. To make certain your HVAC equipment qualifies for the ENERGY STAR designation, get complete information at www.energystar.gov.

Built to Last and Last

Your space-efficient Amana brand APH15M Packaged Heat Pump can be ground/or rooftop-mounted. Its cabinet is built using high-quality, heavy-gauge, zinc-coated steel with a weather-resistant powder-paint finish. A stamped steel louvered grille protects the condenser coil, and the unit's subtle color scheme complements nearly all exterior home environments.

Quiet Performance

We have done our best to combine a quiet, high-efficiency scroll compressor with an optimized

blower system and a fully insulated cabinet to help insure quiet operation, which we hope will make you and your neighbors very happy!

For even greater peace of mind, be sure to ask your dealer or visit our web site at www.amana-hac.com for more details about **Asure**,SM an affordable Parts and Labor Extended Service Plan for your entire Amana Brand HVAC system.[†]

Additional Information

Before purchasing this appliance, read important information about its estimated annual energy consumption, yearly operating cost, or energy efficiency rating that is available from your retailer.

PREMIUM WARRANTY* PROTECTION

** Complete warranty details available from your local dealer or at www.amana-hac.com. To receive the 10-Year Parts Limited Warranty and Lifetime Compressor Limited Warranty, good for as long as you own your home, online registration must be completed within 60 days of installation. Online registration is not required in California or Quebec.*

† Extended Service Plans not available in all states. Ask your dealer for full details.

The Amana® brand **APH15M** Heat Pump Unit Advantages:

- Up to 15 SEER cooling efficiency
- Chlorine-free R-410A refrigerant
- Heating performance of up to 8.0 HSPF
- High-efficiency compressor
- Compressor sound cover
- ECM blower motor
- Liquid-line filter dryer
- Attractive louvered cabinet/coil guard
- Quality, powder-paint finish resists fading and corrosion
- Fully insulated blower compartment for quiet operation

AMANA® BRAND QUALITY

Americans have been relying on long-lasting Amana brand products since 1934, when Amana, Iowa, native George Foerstner accepted the challenge of building a dependable beverage cooler. Since then, the Amana brand has enjoyed many firsts, including developing the first cold storage locker, being the first manufacturer to nationally market an upright freezer for home use, and introducing the first portable countertop microwave oven.

From the technology behind our Million-Air® heat exchanger to what we believe to be the industry's best warranties* to the inclusion of high-quality filter dryers in each of our air conditioners and heat pumps, we remain committed to the Amana brand's legacy of providing consumers with premium heating and cooling products that are built to last.
